

KÄRCHER

WHEN HYGIENE MATTERS MOST.

Cleaning and disinfecting surfaces is more important now than ever to ensure adequate hygiene and to combat harmful germs and viruses. Kärcher can provide solutions to ensure the highest hygiene standards, no matter the surface.

CLEANING FOR HEALTH AND SAFETY.

As there is no current vaccine against the coronavirus, it is very important to maintain strict hygiene in public spaces to prevent the spread. Soils will block the effects of disinfectant or sanitizer, therefore surfaces must be cleaned prior. In a well-maintained environment that is cleaned regularly, the risk of transmission of pathogens is minimized considerably. Kärcher provides solutions to assist you in keeping surfaces clean so they are no longer a breeding ground for germs, bacteria or viruses.

Steamers

Professional steam cleaners are ideal for sanitizing as they can impressively remove up to 99.999% of bacteria without the use of chemicals. Our environmentally-friendly steamers clean flat surfaces and are easy-to use.

Mister and Vital Oxide

A hospital-grade misting system specifically designed for use with Vital Oxide® disinfectant. More efficient than hand-wiping surfaces, as an even coating is applied to all surfaces.

DEMAND**

Touchless Cleaning

Multi-surface cleaning machine, removes soil and bacteria while accurately dispensing cleaning solution at safe pressure, rinses and dries in less time than conventional cleaning methods.

Window & Surface Cleaning Vacuum

Clean high touch points such as glass entry doors and counters with this window and surface vacuum cleaner. Eliminates fingerprints from smooth surfaces with a streak-free clean.

Floor Scrubbers

Wet scrubbing in one step with immediate absorption of dirty water, allows for larger areas to be cleaned in a shorter time. Walk behind or ride-on models depending on the area you're cleaning.

Hot Water Pressure Washers

Hot water speeds cleaning compared to cold water cleaning. In addition using temperatures of at least 185°F can effectively combat germs, bacteria and viruses.
